# A Versatile, Economical 8" Plastic Blower, with UL-approved Motor

## Unparalleled Airflow for Confined Space Ventilation

With 1/3hp motor, this super-quiet blower boasts an airflow rate of 980 CFMs, the highest in this price category.

## Built Tough for Performance

The 9-blade polypropylene impeller and powder-coated steel grill add to the blower's long-lasting qualities. A bottom enclosure is built-in to protect electrical components. The rugged housing of the blower and duct canister is made from UV, corrosion and chemical-resistant polyethylene material.

## User-Friendly Design Features

Easy-grip handles are molded directly into the blower and canister, eliminating 'shaky' handles caused by loose fittings. Duct canisters feature a quick-connect clipping system that efficiently attaches the canister to the blower for ventilation or extraction.

The canister stores the duct and protects it from rips and tears. Canisters are available with 15' or 25' duct.

### Specifications:

#### Model K20 8-Inch Plastic Blower

Motor:	UL approved 1/3hp
Fan Size:	8" x 9 blade impeller
Amps:	Start: 8.5
Noise:	74dB
