

RIKEN

Continuous monitoring for FC, HCFC, HFC and IPA

INFRARED SINGLE GAS MONITOR**MODEL RI-257****General**

The model RI-257 series are designed to measure the presence of either Fluoro compound (FC) gas, Hydrofluoro compound (HFC or HCFC) gas representing VERTREL XP (HFC-134a) or IPA in the specified range through the built-in continuous operation pump.

As they are based on NDIR (Non-Dispersive Infrared) method, the sample gas specified can be measured without interference from other gases.

Features

- Compact & light weight (Approx 3.8 kg)
- Easy to install
- Negligible interference from other gases
- Easy to read digital display

Applications

- Cleaning processes
- Cold-storage plants
- Drying rooms
- Refrigerators
