Premium Products and Superior Service

Leaders in Training

Since 1975, MTEch has been a leading resource for safety education training courses. All of the classes we offer are available in both Ohio and Michigan and the majority have been approved for continuing education credits by the Ohio EPA and/or Michigan EGLE (see details below). Classes can either be hosted by MTEch or take place on-site at customer's location. For our group classes, there is a 6 person minimum and 18 person maximum on attendees per session. We also host a full Confined Space Entry course at our facility in Cleveland on the second Thursday of each month for individual attendees (\$195/person or \$175/person w/4+ registrants). Our trainers are professional and knowledgeable industry experts that you can trust when it matters most!

Class	Length	Cost*	Hands On	OEPA	EGLE
