

ACCUPOINT
PRECISION LOCATING SYSTEM

**CONFIDENT.
ACCURATE.
BUILT FOR THE FIELD.**

Locating and tracing sewer and storm lines can be challenging, especially when rubber seals, insulators, or gaps between pipe sections make detection difficult. The Accupoint Precision Locating System from CUES takes the guesswork out of the job, helping crews work faster, safer, and with complete confidence.

The Accupoint locator and transmitter are designed with the sewer and stormwater industry in mind. Built tough for on-site use, Accupoint delivers accuracy, reliability, and ease of use, every time.

WHY CHOOSE THE CUES ACCUPOINT LOCATOR?

- **Dynamic Overload Protection** – Cuts through interference and performs in electrically noisy environments where other locators struggle.
- **TruDepth Technology** – Ensures depth readings are only displayed when the locator is positioned correctly over the target.
- **Compass Orientation** – Get a clear visual of pipe or cable direction for faster, more accurate locates.
- **Guidance Mode** – Proportional arrows, Target Position Indicators, and audio tones guide you directly to your line.
- **Depth & Current Readout** – Dual information display ensures you're tracking the correct target.

A LOCATOR THAT WORKS AS HARD AS YOU DO

Built for on-site use
IP65 Shock resistant,
ingress protected
casing protects against
knocks, drops, water
and dust

Accupoint MS611 Locator

- Detects 3 sonde frequencies for all types of non-metallic pipe
- Locates 4 active line frequencies
- Peak+ Mode with Guidance Arrows, specifically designed for CCTV inspection system users
- Powered by two long-lasting LR20 D-cell alkaline batteries
- Rugged, IP65-rated casing protects against dust, water, shocks, and drops
- On-Site Ready
- Heavy-duty, shock-resistant design

Alkaline battery pack (2 x LR20 D-cells)

90V signal output and
automatic impedance
matching

Accupoint MS620 Transmitter

- 5W transmitter with 90V output for deeper, longer-distance locates
- Automatic impedance matching for strong, reliable signals
- Ingress protection against dust and water
- Portable kit with base tray and accessories

Base tray for accessories

THE BOTTOM LINE

With Accupoint, you don't just locate, you locate with confidence. Built tough for the field, designed for accuracy, and backed by CUES, the Accupoint Precision Locating System helps your crew avoid costly mistakes, minimize downtime, and get the job done right the first time.
