

REDI KIT TROUBLESHOOTING SYSTEM

TAKE THE TROUBLE OUT OF TROUBLESHOOTING

Meet the CUES REDI Kit – your first line of defense against downtime.

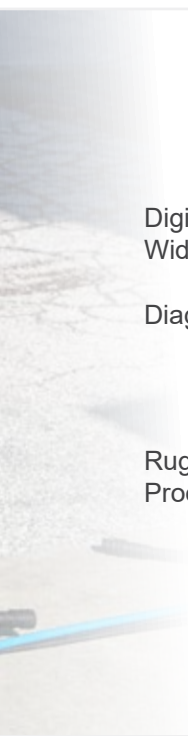

Unplanned equipment issues can bring pipeline inspection work to a standstill. The CUES REDI Kit is the industry's first-ever troubleshooting kit designed specifically for CCTV pipeline inspection systems, giving your crew the tools to quickly diagnose, repair, and get back on the job.

Built with the same rugged reliability as every CUES product, the REDI Kit helps you stay productive in the field and avoid costly delays.

WHY CHOOSE THE CUES REDI KIT?

- ❖ **Faster Support with Live Video -**
A high-resolution web camera enables direct video calls with CUES Technicians, Parts Specialists, and Engineers for instant troubleshooting and parts identification.
- ❖ **Smarter Electrical Diagnostics -**
The Diagnostic Test Box makes voltage readings safer and more accurate, without disconnecting your camera or transporter.
- ❖ **Built-in Backup Camera -**
Eliminate downtime with an onboard mini-camera that verifies video path performance when your main camera is in question.
- ❖ **Reliable Footage Testing -**
The Footage Test Box can replace your encoder to confirm footage signals and power supply, compatible with both new and legacy reels.
- ❖ **Complete Computer Troubleshooting -**
A USB diagnostic tool helps track down computer and power-related issues fast.
- ❖ **All-in-One Convenience**
Includes a CUES-approved multi-meter, cables, and adapters—all packed in a rugged, weatherproof case that's ready for the field.
