

SEWER CLEANING NOZZLES **TRAINING**

Leaders in Training. Since 1975, MTech has been a leading resource for safety education training courses. All of the classes we offer are available in both Ohio and Michigan and the majority have been approved for continuing education credits by the Ohio EPA and/or Michigan EGLE (see details below). Classes can either be hosted by MTech or take place on-site at customer's location. For our group classes, there is a 6 person minimum and 18 person maximum on attendees per session.

In this course, attendees will learn everything from the beginner basics to the industry's latest advanced techniques for operating sewer cleaning trucks so they can perform their jobs safely and efficiently. This class has something to offer for all levels of operator experience.

Training for a Safer Workplace

One of the best investments you can make is in well-trained employees. Workers who know what they're doing are more engaged, reduce workplace injuries and improve efficiency.
