

NON-CDL HYDRO-EXCAVATOR

Small Truck. Big Performance. Don't let the size fool you, our non-CDL hydro excavation truck packs a serious punch. Equipped with a six-inch blower system, our 3,600 CFM positive-displacement blower has no issues pulling difficult or deep material. This truck features a 300 gallon, stainless steel water tank and a 1,000 gallon (5-Yard) debris tank. We mount a Giant tri-plex water pump that can flow up to 15 gallons per minute at 3,000 PSI allowing you to cut through even the toughest dirt and clay to get the job done. Dropping the CDL requirement allows flexibility in scheduling, making sure you can put the right operator on the job every time. Our mission is performance and our path is simplicity. Ease of operation means less down time and more productivity. This non-CDL truck meets those qualifications and is the perfect addition to any fleet.
