

MUDMASTER WHEELED TRANSPORTER

TACKLE THE TOUGHEST PIPELINES WITH POWER, PRECISION, AND PERFORMANCE

When pipeline conditions get extreme, like high flow, deep mud, sand, and heavy debris, you need a transporter built for the challenge. The CUES Steerable Mudmaster delivers unmatched power, high ground clearance, and all-wheel drive to conquer pipelines from 24" to 200" (610 mm–5080 mm) with confidence.

Engineered to work seamlessly with 2000' (610 m) of multi-conductor cable, the Mudmaster combines rugged traction with pneumatic tires for stability in the harshest environments. Add optional tandem wheels for even greater performance.

WHY CHOOSE THE CUES MUDMASTER?

- ❧ **Versatile Pipeline Range** – Inspects 24"–200" (610-5080 mm) pipelines with ease
- ❧ **Compatible with CUES's OZIII-S & OZ4-HD Cameras** – Get crystal-clear footage in any condition
- ❧ **Manhole-Friendly Design** – Fits through openings as small as 19" (483 mm)
- ❧ **Self-Propelled Efficiency** – Power forward, power reverse, and freewheel modes
- ❧ **Turn in it's Own Length** – Maneuverability that lets you pivot in tight spaces
- ❧ **Built for Stability & Safety** – Low center of gravity, long wheelbase, and rollover-resistant design

□ — **Powerful Illumination –**

255-watt lighting system with three adjustable lamps lights up the job

□ — **Perfect Camera Positioning –**

Remote-operated adjustable lift ensures the best possible view

□ — **Dual-Motor Strength –**

Delivers the power you need for longer inspections

Unstoppable Traction — □

Four or eight-wheel drive options keep you moving under any circumstances

BUILT TOUGH. BUILT SMART. BUILT FOR RESULTS.

The Steerable Mudmaster isn't just a transporter, it's your ultimate solution for inspecting massive pipelines without compromise. Contact us today for a demo or more information!
