

ULTRA SHORTY III TRACKED TRANSPORTER

COMPACT POWER. MAXIMUM PERFORMANCE.

When space is tight, Ultra Shorty III delivers big results. With its reduced camera/tractor length, it easily enters pipelines with limited space, tackles 22°, 45°, and even 90° sweeps, and operates seamlessly in 6" (152 mm) relined to 24" (610 mm) pipelines, even when faced with major offsets and protruding laterals.

When paired with the optional CUES OZIII-S or OZ4-HD Cameras, Ultra Shorty III delivers unmatched inspection capability in the most challenging environments.

WHY CHOOSE THE CUES ULTRA SHORTY III?

- **Compact Advantage** - Designed with a reduced camera/tractor length, Ultra Shorty III easily navigates inverts with limited space and tackles 22°, 45°, and 90° sweeps with confidence.
- **Maximum Clearance in Minimum Space** - Optimized for 6" relined pipe, with weighted adapter blocks that keep your camera perfectly centered while increasing traction and bottom clearance.
- **Reliable Performance** - Featuring a proven transmission system with power forward, freewheel, power reverse, and high-speed retract, you'll operate with confidence, without worrying about cable damage or tough retrievals.
- **Built Tough for Tough Conditions** - Self-cleaning drive sprockets and contoured high-traction cleats are designed to handle mud, sand, and debris, keeping your inspections running smoothly.
- **Direct Camera Connection** - With a built-in protective housing and connector, simply mount your CUES OZIII-S or OZ4-HD Camera, no interface cables required.

- Waterproof bulkhead connector for reliable CUES OZIII-S or OZ4-HD camera integration.
- Compact width allows full pan, tilt, and zoom camera movement in 6" relined pipes.
- Inspect 6" (152 mm) relined to 24" (610 mm) pipelines with ease.
- Gain greater traction and stability with weighted track extenders.
- Boost productivity with fast, reliable inspections in tough environments
- Contoured high-traction cleats maximize grip for reliable movement.

Put the Ultra Shorty III to work for you!

Whether navigating relined pipes, backing out of a dropped manhole, or inspecting through mud and sand, the Ultra Shorty III is engineered for maximum reliability, efficiency, and performance.

BUILT TO PERFORM. BUILT TO LAST. BUILT BY CUES.
