HYDROVAC & INDUSTRIAL TURBO NOZZLE

SILENCER

WITH ALL NEW AND UNMATCHED PERFORMANCE, LONGEVITY, EFFICIENCY, AND SAFETY BY DIG PIG PRODUCTS

UNMATCHED LONGEVITY

Our heavy-duty Silencer is by far the toughest nozzle on the market today. Constructed with the hardest machined Cover made from Nylon Infused Plastic, giving the ultimate protection to the nozzle and underground utilities. The body and inlet are made from 303 stainless steel and the rotor is made with strengthen anodized aluminum and stainless steel, unlike our competitors with plastic internals parts. Our Carbide and Seats parts are 80% stronger than any other nozzle on the market for greater longevity and greater shock impact for timely wear. Our advance Coin Filter System also adds extra protection to the nozzle internals from greater water filtration!

UNMATCHED PERFORMANCE

The performance of the Silencer's advanced stream technology is unmatched. Our tight, Zero Degree water stream, at up to 4200 PSI, rotates at an optimal speed to provide a 10-degree cone of ground or object coverage.

6 SIZES TO CHOOSE FROM [4, 6, 8, 9, 10, 12 SIZES]

UNMATCHED EFFICIENCY

The Silencer is a completely new and modern design to all turbo nozzles. Dig Pig's design is a perfect balance of rotation of RPM for better ground cutting capabilities, but protects sensitive underground utilities and objects. Rated for 205F/96C and 4200 PSI, this nozzle has the ability to handle extreme temperatures and be the leading nozzle against frozen conditions and hardened ground types. With the Silencer Nozzle you can complete jobs faster, using smaller nozzle sizes with larger GPM flow rates and less vibration, than your competitors.

UNMATCHED SAFETY

We Know safety is everything. Our highly durable Non-conductive Hi-Vis yellow safety cover represents safety and protects the operator, utilities and the life span of the nozzle. The name "Silencer" says it all, the name came from its super quiet rotation keeping the job site safer and the operator focused and concentrated on other more important job site hazard noises. Also, the Silencer is well known for its very low vibration over all its competitors!

REFRESH KITS FOR EVEN LONGER USE

Specifications

- Minimum Inlet pressure: 1,000 PSI
- Maximum Inlet pressure: 4200 PSI (2500 PSI recommended)
- Housing material: Stainless steel
- Maximum water temperature: 205 degrees Fahrenheit 96 degrees Celsius
- Nozzle tip and seat material: Tungsten carbide
- Protective cover: Advanced low wear nylon machine cover
- Inlet connection: Threaded half inch and FNPT ORB
- Filter coin: Advanced filtration stainless steel screen and ORB #12 fitting 1/2inch FNPT
- Weight: 1.6 pounds / 0.726 kilograms
- Color: Hi-Vis safety yellow/green

THE TOUGHEST ROTORS AND CARBIDES

5 MONTHS WEAR

NOZZLE SIZE	FLOW RATE CHART (GPM)

EASYGRIP

INDUSTRIAL LANCE HANDLE

Made by

EASYGRIP

INDUSTRIAL LANCE HANDLE

The Easy Grip by Dig Pig Products is truly the next leader in comfort within the Hydrovac & Industrial industries, allowing improved operator control, ease and safety. With multiple many mounting configurations available every operator will find the perfect desired fit of comfort.

SPECIFICATIONS / INFORMATION

- Made from Aluminum
- Type 2 anodized coating
- 3-1/2" NPT Female ports
- Never rusts or corrodes for a long service life
- Red Anodized Finish to reduce dirt buildup
- Reduced weight
- Can be mounted in many configurations
- Comes with one, 1/2" NPT plug
- Option to purchase aftermarket Easy Grip PSI Gauge

EASYGRIP PSI GAUGE

The Easy Grip PSI Gauge can be attached at any time, giving the operator accurate nozzle pressure readings right at their fingertips, for precise control on critical digs!

MANY MOUNTING CONFIGURATIONS FOR YOUR COMFORT AND EASE

ARMOR GUARD

MAGNETIC SPLASH GUARD

Made by

Patent Pending

Made by

THE

TITAN

SERIES

THE TITAN SERIES

The worlds Toughest Industrial Lances!

TITAN HD

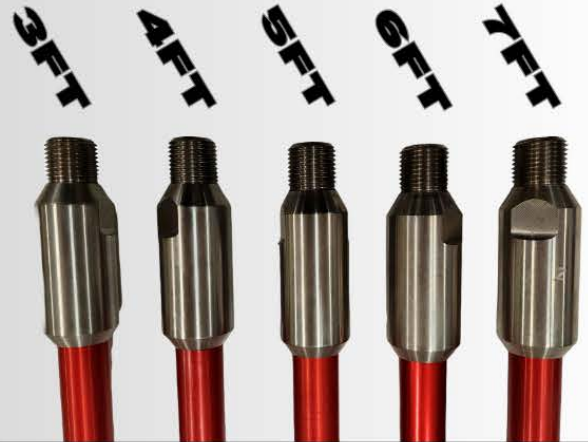

- Strongest lance on the market
- 1/2 Male NPT ends, CNC machined out of 303 SS
- Pipe socket prevents breaking pipe threads
- Reduced port prevents breaking lance connection threads
- Brilliant Stainless Finish
- SS 316L Schedule 40 Pipe thickness/ Seamless
- Extra Strength 303 machined ends
- Made in 7, 6, 5, 4, 3ft lance/extensions
- Never to rust or corrode
- Less vibration, less hand numbing & No flex, Better handling
- Safest lance on the market (Highest PSI Rating)
- Strongest lance on the market
- Reduced Flex for improved operator control
- Longest lasting lance on the market

Patent Pending

TITAN LIGHT WEIGHT

- Strong & light weight
- 1/2 Male NPT ends, CNC machined out of 303 SS
- Pipe socket prevents breaking pipe threads
- Reduced port prevents breaking lance connection threads
- Anodized red for extra strength
- 6061 T6 SCH 80 Seamless Aluminum
- Seamless for maximum durability & safety
- Never rusts or corrodes for a long service life
- Red Anodized Finish to reduce dirt buildup
- Reduced weight for less operator fatigue
- Made in 7, 6, 5, 4, 3ft lance/extensions
- Never to rust or corrode
- Less vibration & less flex, Better handling
- Safest Aluminum lance on the market (Highest PSI Rating)
- Strongest Aluminum lance on the market
- Reduced Flex for improved operator control
- Longest lasting lance on the market

THE **TITAN** SERIES

The worlds Toughest
Industrial Lances!

TITAN HD

- STRONGEST LANCE ON THE MARKET.
- HALF INCH MALE NPT ENDS.
- STAINLESS FINISH.
- STAINLESS STEEL SCH 60 SEAMLESS.
- EXTRA STRENGTH 303 MACHINED ENDS.
- MADE IN 7,6,5,4,3 FT LANCE / EXTENSIONS.
- NEVER TO RUST OR CORRODE.
- LESS VIBRATION & NO FLEX, BETTER HANDLING.
- SAFEST LANCE ON THE MARKET (HIGHEST PSI RATING).
- STRONGEST ALUMINUM LANCE ON THE MARKET.
- LONGEST LASTING LANCE ON THE MARKET.

TITAN LIGHT WEIGHT

- STRONG & LIGHT WEIGHT.
- HALF INCH MALE NPT ENDS.
- ANODIZED RED FOR EXTRA STRENGTH.
- 6061 T6 SCH 80 SEAMLESS.
- EXTRA STRENGTH 303 MACHINED ENDS.
- MADE IN 7,6,5,4,3 FT LANCE / EXTENSIONS.
- NEVER TO RUST OR CORRODE.
- LESS VIBRATION & LESS FLEX, BETTER HANDLING.
- SAFEST ALUM LANCE ON THE MARKET (HIGHEST PSI RATING).
- STRONGEST ALUMINUM LANCE ON THE MARKET.
- LONGEST LASTING LANCE ON THE MARKET.

TOOL GRABBER

UNIVERSAL TOOL HOLDER

BY DIG PIG PRODUCTS INC

Made By

TOOL GRABBER

UNIVERSAL TOOL HOLDER

The Tool Grabber, by Dig Pig Products, is the ultimate universal tool holder for quick and safe access, by holding lances and wands in a secure vertical position!

A perforated base with a elevated design allows draining of lances and wands and easy cleaning. The patented gripping technology relieves the annoying traditional mounting kits with replaceable pins

Specifications

- Made from lightweight aluminum
- Brilliant anodized hardened finish
- Stainless steel Hardware
- Patented Rubber holders
- Advanced gripping technology will hold most lance/wand configurations
- Guaranteed no damage to mounted tools
- Comes with mobile unit Mounting Hardware and permanent wall Mounting hardware
- Base Mount designed for easy cleaning by allowing wands to drain and never freeze up
- Will fit most half-inch lance/wand configurations
- will never rust or corrode
