

CUES

MICRO PAN & TILT CAMERA

MAXIMUM VISIBILITY. MAXIMUM CONTROL. MINIMAL HASSLE.

Take your pipe inspections to the next level with the CUES Micro Pan & Tilt Camera, a powerful, compact solution designed to work with the LAMP II system to navigate the toughest environments with ease.

Whether you're tackling municipal pipelines, contractors' lateral inspections, or cross bore prevention, this camera delivers crystal-clear visuals and full maneuverability where it matters most.

WHY CHOOSE THE CUES MICRO P&T CAMERA?

Total Maneuverability -

- Continuous 360° pan & tilt rotation
- Navigate through multiple wyes, 45° and 90° bends, and sweeps with the detachable steering wand

Smarter Inspections -

- Built-in multi-frequency sonde (512 Hz or 8 kHz) for accurate locating
- Onboard lens wiper keeps your view clear without removing the camera
- Direct the camera and lights to quickly spot roots, cracks, offsets, and joint separations

Field-Ready Design -

- Rugged carrying case for protection and portability
- Built tough for demanding inspection environments

See Every Detail -

- White LED lighting with variable intensity control
- Scratch-resistant sapphire window for durability
- Self-leveling camera head for stable, upright views

THE PERFECT PAIRING

The CUES Micro Pan & Tilt Camera integrates seamlessly with our LAMP II system, giving you a complete inspection solution for mainlines and laterals.
