

Scout Jet Camera System

Inspect While You Jet

Turn the jetter or combo truck you are already run into a powerful inspection tool. Simply send the Scout through the line during your cleaning pass, then review crisp footage on your phone or tablet within minutes, **right there on-site**. No extra hardware. No specialized training needed.

**10,000 FT/DAY**

DOCUMENTED PER DAY

6" & 8" MAINLINES

ADAPTABLE FOR LINES UP TO 14"

25-85 GPM

RUNS ON YOUR JETTER OR COMBO TRUCK

▶ ▶ HOW IT WORKS

1

ATTACH

Thread the Scout onto your jetter hose. If your truck runs 25-85 GPM, you're ready to go.

2

RUN THE LINE

Jet the line like you normally would. The Scout records while its sealed LED ring lights the pipe ahead.

3

REVIEW ON-SITE

Pull the footage to your phone or tablet before you leave. See the blockage, the break, or the clean line same day.

▶ ▶ BUILT FOR YOUR CREW

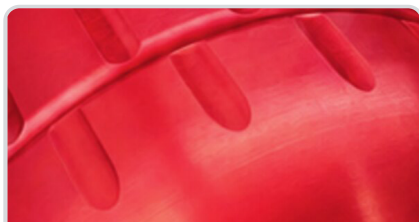

CONTRACTORS

- ▶ Diagnose on the first visit **and** show customers exactly what's in their line before you quote the repair.
- ▶ Clean and inspect in a single pass instead of scheduling a second trip.
- ▶ Add inspection capability for a fraction of the cost of a dedicated camera setup.

MUNICIPALITIES

- ▶ Document up to 10,000 feet per day toward your CMOM requirements.
- ▶ Keep crews productive without tying up the CCTV truck.
- ▶ Footage saves to SD cards, so your maintenance records are ready when you need them.

» » BUILT TO TAKE THE JOB

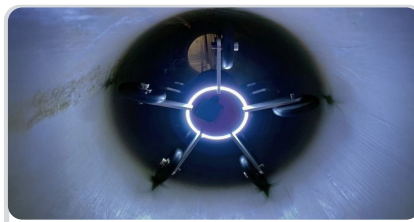

HARD-ANODIZED BODY

Type III Hard anodizing. This is the toughest treatment process for 6061 aluminum that stands up to daily jetting.

PROTECTED CAMERA

The camera rides inside the nozzle body, shielded from direct impact with debris.

360° LED RING LIGHT

150 lumens of sealed light with 8+ hours of runtime enough to light lines up to 12".

REPLACEABLE FIN PLATES

Stainless steel fins extend past the body to take the hits and can be swapped out in minutes.

REMOVABLE GOPRO CAMERA

Removable Waterproof GoPro Camera with 4K Capabilities.

RECHARGEABLE BATTERY

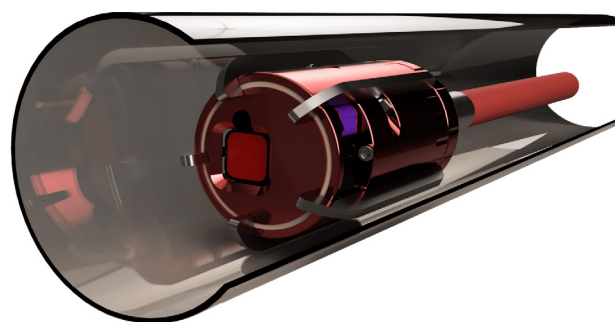

Sealed lithium cartridge swaps out in seconds and recharges between shifts.
