

TRAILER-MOUNTED  
CUSTOM SYSTEMS

## THE FLEXIBLE ALTERNATIVE TO TRUCK-MOUNTED SYSTEMS

CUES trailer-mounted systems are designed to deliver the same reliability and performance as our industry-leading truck-mounted units, without the expense of a dedicated vehicle.

CUES trailer-mounted systems can include TV inspection equipment for sewer/storm/potable water lines, mainline joint or lateral sealing, and lateral reinstatement cutters for the relining industry. A variety of options can be added to expand your system, as needed.

## WHY CHOOSE A CUES TRAILER-MOUNTED SYSTEM?

- ✦ **Cost-Effective –**  
Save money compared to purchasing a full inspection truck
- ✦ **Flexible Setup –**  
Use with a variety of vehicles
- ✦ **All-in-One Design –**  
Includes a Control Room (operator's station & viewing area) and an Equipment Room (mounting & storage)
- ✦ **Operator Comfort –**  
Roof-mounted 13,500 BTU A/C, optional heater, ergonomic control console
- ✦ **Work-Ready –**  
Equipped with strobe lights, LED floodlights, and optional configurations tailored to your needs

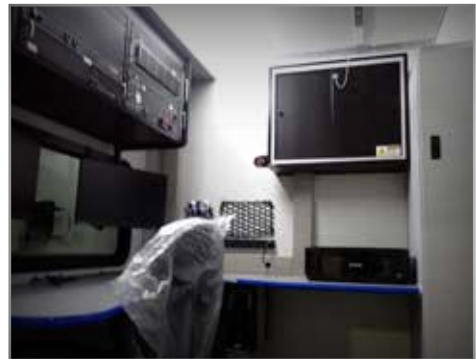

## CUSTOMIZATION THAT FITS YOUR NEEDS

A variety of options can be added to expand your system, as needed -

- TV Inspection Equipment for sewer, storm, or potable water lines
- Mainline Joint & Lateral Sealing
- Lateral Reinstatement Cutters for relining projects
- Customizable Interiors, Cabinets & Mounting Configurations

## YOUR SYSTEM. YOUR WAY.

Every CUES trailer-mounted system is custom-built to fit your inspection and rehabilitation requirements. From interior layouts to equipment integration, you get the power of a truck system in a versatile trailer package.
